

BYTFIN OFFICIAL BUSINESS MODEL

bytfm.com

What's interesting #cryptomarket?

The crypto market is a unique environment with many attractive features:

High Yield Potential: the opportunity to earn high returns thanks to the rapid rise in cryptocurrency rates.

Portfolio diversification: the ability to add cryptocurrencies to a portfolio to diversify and reduce risk.

Innovation and technological advancement: cryptocurrencies and blockchain are new technologies that support innovation in various areas such as finance, decentralised applications and data management.

Continuous operation: The crypto market operates continuously without interruption, giving investors the flexibility to react to changes in real time.

Global availability: cryptocurrencies are available to investors worldwide without geographical restrictions.

Decentralisation and security: blockchain technology provides a high level of security and decentralisation of transactions, which increases trust in the system.

Trading and mining: the basis of the cryptocurrency market

The cryptocurrency market was ahead of its time thanks to two key elements: trading and mining.

Mining

The blockchain technology that underpins cryptocurrencies requires computing power to secure the network and verify transactions. The mining process ensures the decentralisation and sustainability of cryptocurrencies and creates new units of cryptocurrency in exchange for computational tasks.

Trading

Active buying and selling of cryptocurrencies keeps the market alive and creates profitable opportunities. The open, continuous trading mode allows investors to react to price changes in real time, analyze them and make informed decisions.

opportunity to

BYTFIN ECOSYSTEM

Das BytFin-Team

Roman Tetov

CEO, startup and blockchain technology expert. He is the founder of several innovative projects using cutting-edge solutions in the cryptocurrency and blockchain industries. Thanks to his leadership, companies have achieved significant success by implementing blockchain into business processes and developing market-changing products. Roman actively shares his experience with other entrepreneurs, inspiring them to create their own successful projects and use new technologies for business growth and development.

Li Jian

A talented developer from China specialising in creating decentralised applications and smart contracts on the Ethereum platform. He is actively working on improving scalability and security of BytFin blockchain protocols.

Karlis Tamm

Estonian cryptocurrency expert
Karlis Tamm is a cryptocurrency and DeFi expert working in startups. He develops innovative solutions for digital assets.

Markus Weinberg

Financial Analyst
Markus is originally from Estonia and researches crypto markets and analyses financial assets. He also advises startups on tokenomics and blockchain investments.

Our mission is to make cryptocurrency accessible to everyone, regardless of experience or technical expertise. We aim to break down the barriers that hold back mass adoption of digital currencies and create world-class products that help users manage their assets safely and efficiently. Innovation, security and ease of use are at the heart of what we do.

Operating model

BytFin brings together current blockchain trends and community in one ecosystem. With a simple and intuitive interface, users have access to key products:

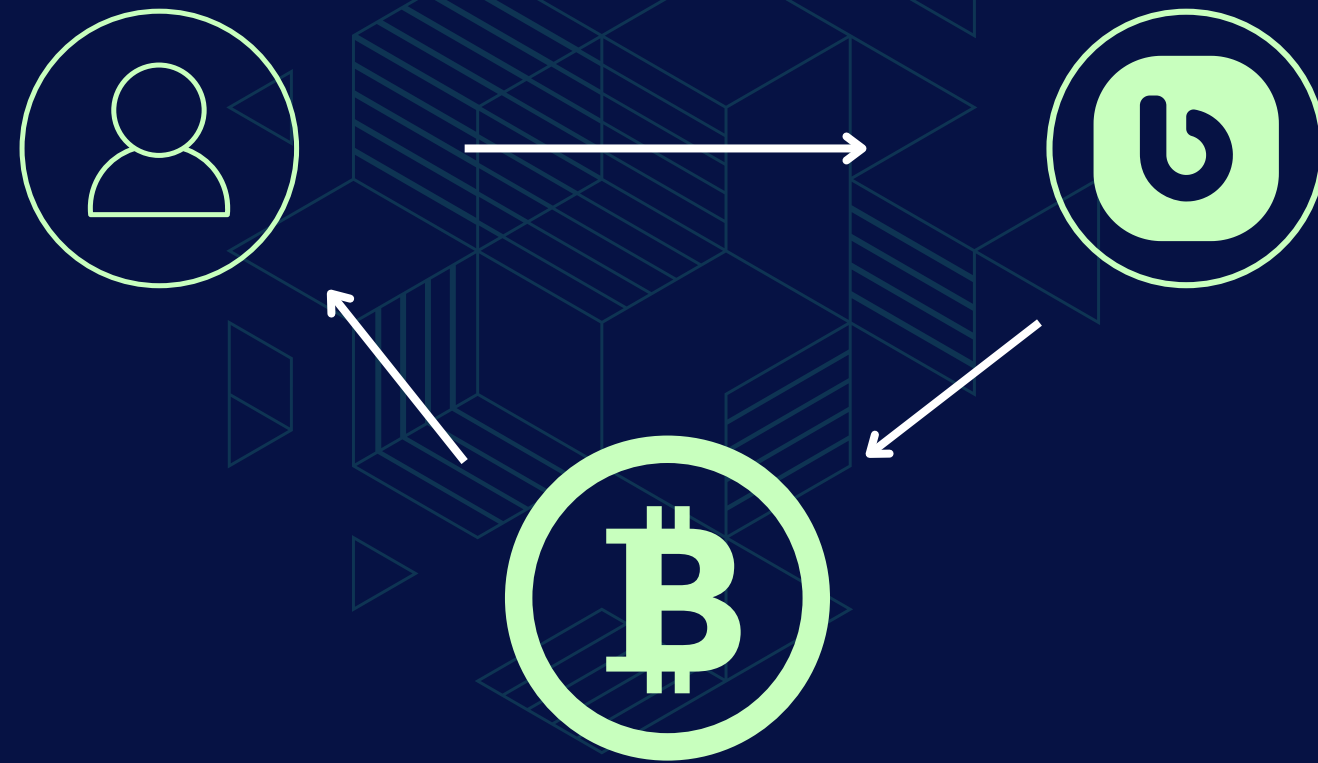

- Decentralised Finance (DeFi)
- Trading
- Position hedging
- Asset Funding and Tokenisation
- Digital products
- Education and community

BytFin is a platform where blockchain technology becomes accessible to everyone!

BytFin

How does it work?

A CLIENT OPENS AN
ACCOUNT WITH BYTFIN

1

BYTFIN DISTRIBUTES FUNDS TO
THE INCOME POOL

2

Customer funds are used to earn money from:

- ✓ Mining - supporting the operation of blockchain networks.
- ✓ Trading - BytFin trades independently on crypto markets, providing efficient money management and sharing profits with users.
- ✓ Risk hedging - the platform uses hedging strategies to protect assets from market volatility and pays users a percentage of the income saved.
- ✓ Digital products - the company creates and manages digital assets, distributing revenue from their realisation to users.
- ✓ Transaction provisioning - participating in decentralised ecosystem processes.

PROFITABILITY IS DISTRIBUTED TO
THE PARTNERS AND THE COMPANY

3

Income distribution

We strive to operate transparently and responsibly and therefore distribute our profits as follows:

10%

Insurance fund: we allocate 10% of the profits to an insurance fund that guarantees investors a return at any time within two months of the start of the investment. This provides our clients with reliability and security.

10%

Company income: 10% of the profit is retained by the company as income, which is used to develop and improve our services and to ensure the financial stability and growth of our business.

80%

Investors and marketing: the remaining 80% of the profits are distributed to our investors and through our marketing plan. This allows us to provide high returns to our clients while developing and promoting our business.

This allocation of funds allows us to ensure the sustainability, competitiveness and long-term prospects of our investment opportunities.

Join us and start earning with BytFin!

Open an account and gain access to unique investment opportunities:

BytFin

We are pleased to introduce a new stage in **BytFin** development - the launch of our own BTF token!

What does this mean for our users?

Circulation in the ecosystem: The BTF token will become an integral part of all BytFin products and services, uniting our platform and users.

Financial independence: Token holders will be able to earn dividends by participating in the company's development and contributing to a decentralised future.

Discounts and privileges: With BTF, users will receive exclusive discounts on all BytFin products, making it even more profitable to use the platform.

Roadmap 1-3 Quarter 2025.

Key events in 2025

BytFin Banking: introduction of cryptocurrencies, cashback system and reference program

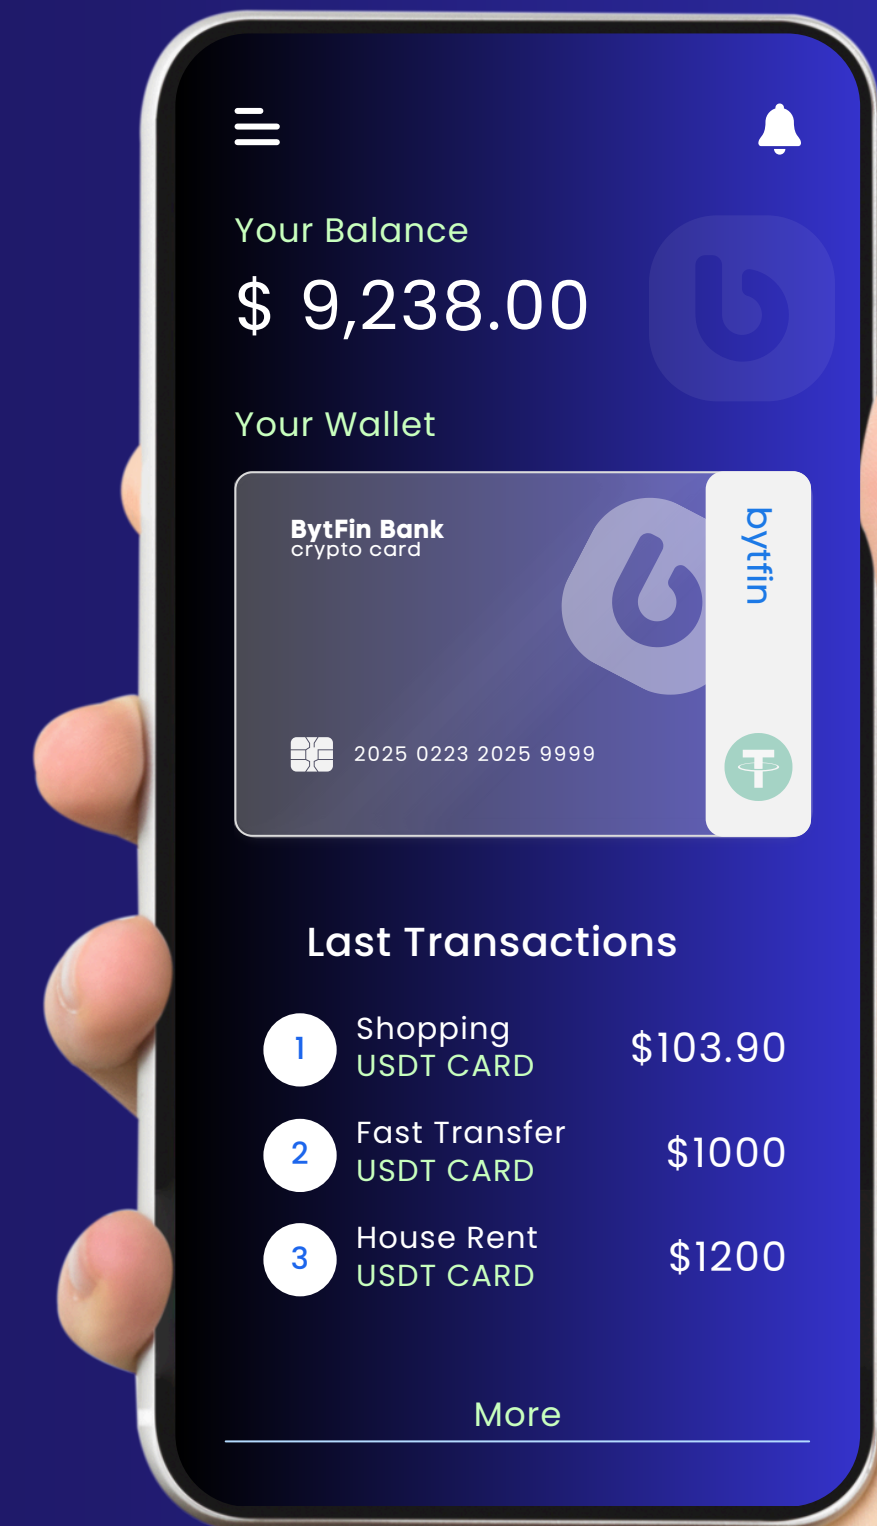

We are pleased to introduce our innovative cryptocurrency, cashback system and referral program for our customers:

1. Cryptocurrency: our cryptocurrency card allows you to use cryptocurrency in your everyday life, to make purchases, pay for services and access funds anytime, anywhere.

2. Cashback system: We provide a cashback system that allows you to get money back for every transaction you make using our cryptocurrency. This is another way to save money and increase your income.

3. Referral Program. We will reward you for every new member that joins our platform thanks to your invitation.

All partners with a deposit of 1,000 USDT or more with BytFin can register a free cryptocurrency card, while other users can purchase one for a one-time fee of 199 USDT.

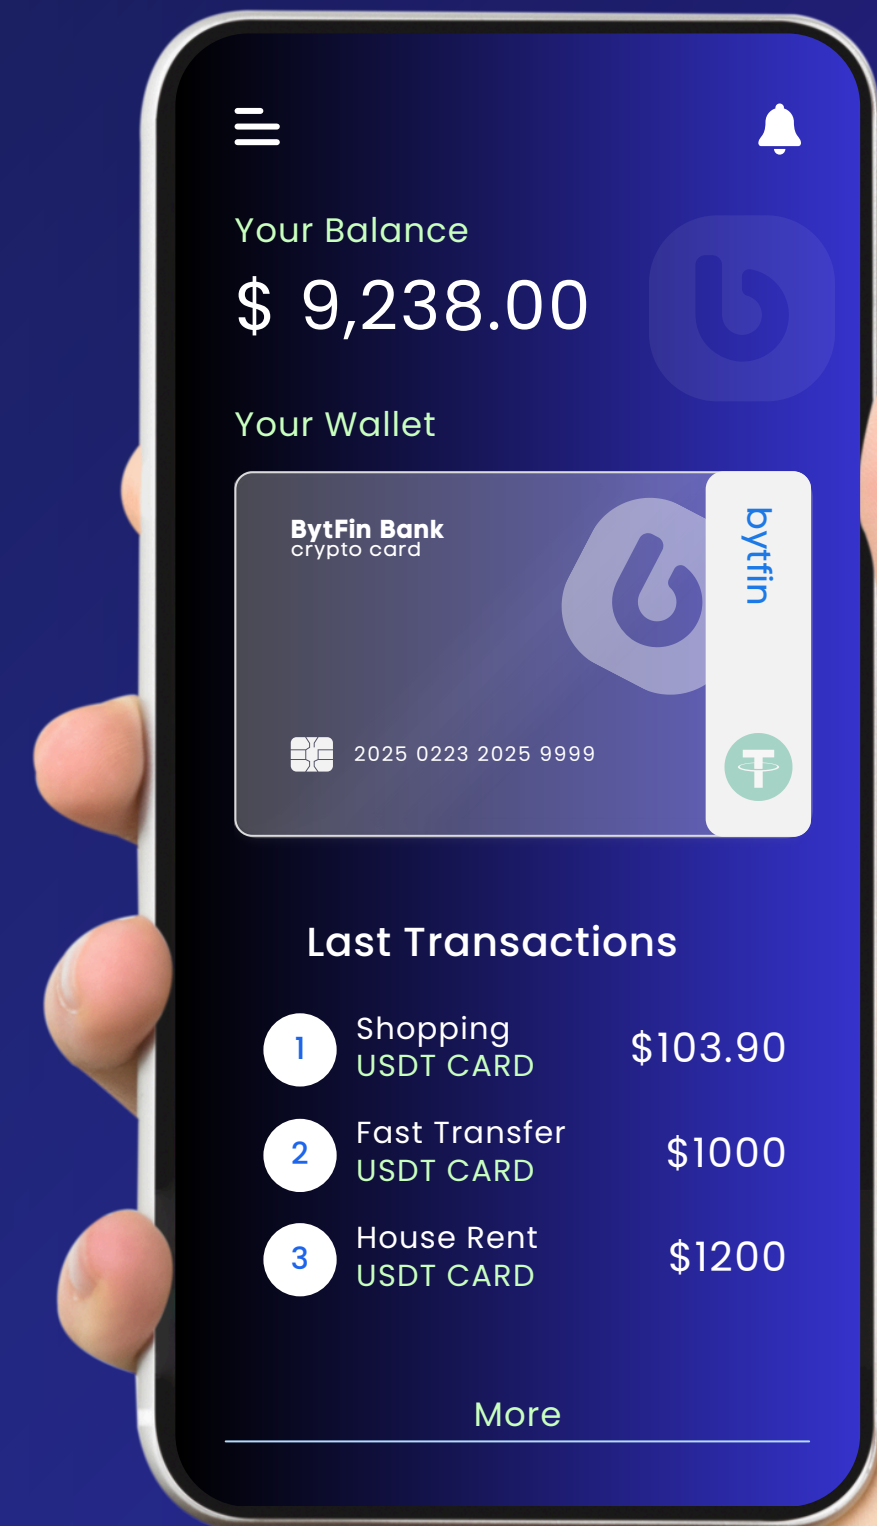

BytFin Banking: a revolution in finance

What are we doing?

1. We provide modern financial services based on cryptocurrencies.
2. We provide safe and easy to use cryptocurrency funds.
3. We support a wide range of transactions including the exchange, storage and transfer of cryptocurrencies.

How do we profit from it?

1. Transaction and exchange fees.
2. Provision of additional services such as credit and investment products.
3. Partnership programs with cryptocurrency asset producers and payment systems.
